

From Your Practice to the Page

Contribute to the *Medical Dosimetry Journal*

Your expertise can advance the profession.

Have you developed a new technique? Solved a challenging clinical problem? Conducted research that could benefit your colleagues? **Share it with the medical dosimetry community.**

The *Medical Dosimetry Journal* welcomes submissions from medical dosimetrists, physicists, radiation oncologists, researchers, and other experts whose work advances the practice of medical dosimetry.

What Can You Publish?

RESEARCH ARTICLE

Share original experimental or theoretical research that advances knowledge in medical dosimetry and radiation oncology.

REVIEW ARTICLE

Provide an authoritative review of an important radiation oncology topic. Reviews may be invited or independently submitted and undergo peer review.

CASE STUDY

Have a clinical solution worth sharing? Case Studies highlight techniques, procedures, clinical implementations, patient-related complications, tricks-of-the-trade, helpful hints, and practical “how-to’s.”

TECHNICAL NOTE

Describe a new development, procedure, or device application that addresses a specific problem and offers value to the broader medical dosimetry community.

DIDACTIC NOTE

Break down a technical or clinical concept that is important to understanding and practicing medical dosimetry. These concise articles are designed with education and clarification in mind.

LETTER TO THE EDITOR

Have a perspective or response to share? Submit a brief response to a recently published article of interest to Medical Dosimetry readers.

Ready to contribute?

Help make this journal BY medical dosimetrists FOR medical dosimetrists!

Explore submission guidelines and submit your manuscript.
