

Regional Director

Candidate: Jennifer Davis BS, RT(T), CMD

1. Why do you wish to serve on the AAMD Board of Directors?

I am excited to apply for the position of Regional Director for the AAAMD Board of Directors. My experience as Region II Representative has deepened my appreciation for the association's mission and community. Over my 20-year career in radiation oncology, I have worked as a therapist, dosimetrist, and in sales, always inspired by the collaborative spirit within the AAMD. As a Regional Representative, I engaged with members, advocated for their needs, and supported initiatives that advance our profession. This role reinforced my belief in the power of shared knowledge and collective growth. I am eager to bring my diverse experience and passion for fostering connections to the board. Serving as Regional Director would allow me to represent dosimetrists nationwide, promoting education, professional development, and innovation. My goal is to ensure every member feels supported and has access to essential resources. I am committed to guiding the organization's future and strengthening our invaluable association.

2. Where do you believe the AAMD should focus efforts during the proposed 3-year term?

In the next three years, the AAMD should focus on three key areas: expanding memberships, enhancing professional development resources, and defining roles and responsibilities as the field of dosimetry evolves. First, by expanding memberships, we can increase our reach and influence, bringing more professionals into our supportive network. Second, enhancing professional development resources will ensure members have access to the latest training and educational opportunities, keeping them at the forefront of the field. Finally, continuing to help define roles and responsibilities will ensure that as dosimetry evolves, professionals are well-prepared to meet new challenges and opportunities. By prioritizing these areas, the AAMD can support its members' growth and advance the profession.
